

Notice of suspension of food import commodities in reefers to Huangpu

27th November 2020

Dear Valued Customers,

Due to stricter customs inspections and disinfection requirements for food import commodities (including but not limited to meat, seafood, dairy, fruits and vegetables), inbound reefer container pick-up activity at Huangpu port in southern China has been slow and is facing congestion.

In consideration of this situation, ONE will stop accepting bookings of food related commodities bound for Huangpu, China, effective from loading date 26th November 2020 until further notice.

For containers in transit, ONE will highly encourage customers to consider a change of destination to other alternative ports, especially for time-sensitive cargoes such as fresh, chilled commodities.

We are closely monitoring the situation and will keep you updated concerning any further developments.

For any further inquiries, please contact your account manager or customer service representative.

Sincerely,
Ocean Network Express Pte. Ltd.
